Secure your SaaS Estate

AppOmni

The Problem

Visibility
Security teams are accountable without SaaS visibility

Sales Finance HR IT IT
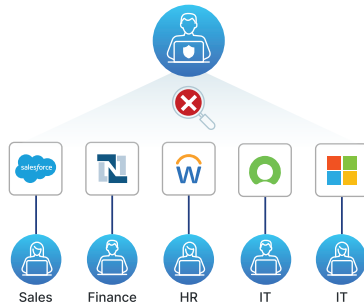

Risk
Shared responsibility model masks sense of SaaS risk

RESPONSIBILITY	SaaS
Compliance & Data Governance	
Identity & Access Management	
Application Controls	
Monitoring	
Patches & Upgrades	
Network Controls	
Host Infrastructure	
Physical Security	

Provider   Customer
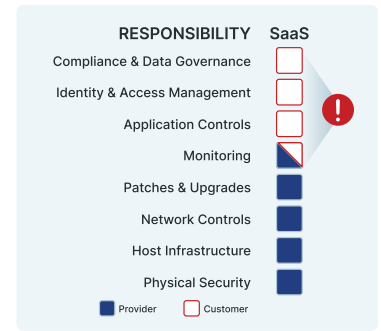

Access
SaaS data risks, access, and threats bypass traditional controls

Remote/External Users

Internal Users

SSE
FW
SWG
DLP
CASB
LB

Complexity
Complex environment - different apps, configs, logs & connections

okta

The Solution
Continuous posture management, threat detection, and vital security insights into SaaS applications.

SaaS Apps from A to Z

servicenow
salesforce   zendesk
okta   veeva   +ableau
HubSpot   NETSUITE   Clari

Exchange
zoom   box
snowflake   slack
asana

fastly
Jira Software   GitHub
Confluence   DUO   Auth0
